15.	Persons Registered for Employment with Commonwealth Employment Service - June, 1961 to February, 1966	21
16.	Persons receiving Unemployment Benefit - June, 1961 to February, 1966	22

I. WAGE AND SALARY EARNERS IN EMPLOYMENT

The series contained in this section are based on comprehensive data (referred to herein as "benchmarks") derived for the purpose from the Population Censuses of June, 1954, and June, 1961.

2. Figures for periods between and subsequent to the two benchmark points of time are estimates obtained from three main sources, namely, (a) current Pay-roll Tax returns; (b) current returns from Government bodies; and (c) some other direct current records of employment (e.g. for hospitals). Data from these sources have been supplemented by estimates of changes in the number of wage and salary earners not covered by the foregoing collections.
3. Figures for current months are subject to revision. As they become available, particulars of employment obtained from other collections, such as the annual factory census and the censuses and sample surveys of retail establishments, are used to check, and, where desirable, to revise estimates in relevant sections. The work force survey (see Section III) will supply an additional check for future estimates.
4. The benchmark figures are derived from particulars recorded for individuals on population census schedules. The estimated monthly figures are derived mainly from reports supplied by employers, relating to enterprises or establishments. These two sources differ in some cases in scope and in reporting of industry; however, the industry dissection of the benchmark total has been adjusted, as nearly as may be, to an enterprise/establishment reporting basis. The industry classification used throughout the series is that of the Population Census of June, 1961.
5. Pay-roll Tax returns are lodged at present by all employers paying more than \$400 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1965). At June, 1954, this Act required employers paying wages of more than £80 (\$160) a week to lodge returns. The exemption limit was raised to £120 (\$240) a week from 1st September, 1954, and to the present level of £200 (\$400) a week as from 1st September, 1957.
6. Employees in rural industry and in private domestic service are not included in the estimates, because of the inadequacy of current data.
7. The figures herein relate to "Wage and Salary Earners" on payrolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include some persons working part-time.
8. The prime purpose of this series is to measure, as nearly as may be with available data, current monthly trends in employment in the defined field. The estimates are subject to less reliability for longer-term measurement.

NOTE. - Any discrepancies between totals and sums of components are due to rounding.

(a) Permanent Defence Forces in Australia and overseas. From July, 1965 includes national servicemen enlisted in the Regular Army Supplement. Where the intake occurred at the end of the month, national servicemen have been included in the defence forces figures in the following month. (National Service trainees in camp under the former training scheme, applicable from July, 1951, to November, 1959, are not included.) (b) Affected by industrial disputes.

NOTE. - This table analyses in detail the figures shown for the manufacturing industry group in Table 4. As well as employees engaged directly in manufacturing activity, these figures include the employees of manufacturing enterprises or establishments who are engaged in selling and distribution, etc.

(a) Comprises Jewellery, watchmaking, etc.; Skins and leather (other than clothing or footwear); Musical, surgical and scientific instruments, etc.; Plastic products; and Other manufacturing. (b) Affected by industrial disputes.

Persons	333.3	244.3	124.6	91.4	69.5	31.1	6.4	21.6	922.2

(a) See note (a) to Table 6. Excludes State and Local Government employees (3.5 thous. persons in December, 1965) engaged in rural industry, or in private homes as employees of government emergency housekeeper services. Also excludes defence forces (see Table 1 on page 3). (b) Includes semi-government bodies.

II. EMPLOYEES IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau. The survey covers practically all private factories with 100 or more employees and a large section of these with between 50 and 100 employees.

2. The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment. It should be noted, however, that the figures in this section include persons on strike but exclude persons stood down as a result of an industrial dispute. To this extent they differ from the employment estimates in Section I of this bulletin. The latter exclude all persons who, as a result of an industrial dispute, are not shown on employers' payrolls.

3. Employers co-operating in the survey are asked to supply, as at the last pay-day in the month, the number of employees in the factory or on the factory office staff, providing their employment is directly related to manufacture. Selling and distribution staff are excluded.

4. Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate tables have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.

5. The table showing employment in industry groups includes particulars for only the five mainland States. Figures for Tasmania cannot be included because of the possibility of disclosing individual factory particulars.

6. In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.

III. CIVILIAN WORK FORCE - SIX STATE CAPITAL CITIES

1. Introduction. - Estimates of the Civilian Work Force in this section are based on results of surveys of a sample of households selected by area sampling methods in the six Australian State capital cities. The first survey was conducted in November, 1960, and surveys have been conducted at quarterly intervals since that date. The surveys are conducted in February, May, August and November each year. The survey information is obtained by personal interview at about 18,500 sample households which are visited during a four-week period each quarter by specially trained enumerators. Each person included in the surveys is classified by work force characteristics on the basis of his actual activity during the previous week as reported to the enumerator.

2. Population Coverage. - The sample used in the surveys covers the metropolitan areas, comprising the six Australian State capital cities as defined for statistical purposes. The surveys are currently in process of extension to non-metropolitan areas. The enumeration includes all persons, 14 years of age and over, living in selected households, with the exception of (a) members of the permanent armed services and national servicemen enlisted in the Regular Army Supplement, and (b) non-Australian diplomatic staff and non-Australian members of their households.

3. Classification of the Work Force. - The classification used in the surveys conforms closely to that recommended by the Eighth International Conference of Labour Statisticians held in Geneva in 1954. In this classification, the work force category to which an individual is assigned depends on his actual activity (i.e. whether working, looking for work, etc.) for a specified week during the four-week period covered by the surveys. A person's activity during the specified week is determined from answers given to a set of questions specially designed for this purpose. The principal categories appearing in the tables in this bulletin are the employed and unemployed, which together constitute the work force, and the remainder who are not in the work force. Details of the classification used are as follows :-

- (i) Employed Persons: all those who, during the specified week:
 - (a) did any work for pay, profit, commission or payment in kind, in a job or business, or on a farm (the category includes employees, employers and workers on own account), or
 - (b) worked 15 hours or more without pay in a family business (or farm), or
 - (c) had a job, business or farm, but were not at work because of illness, accident, leave or holiday, industrial dispute or because of production hold-up due to bad weather, plant breakdown, etc.

Persons who had a job but were temporarily laid off by their employers for the whole week without pay are excluded, and are classified in the tables as unemployed. Persons who did some work during the week, however, before they either lost their jobs or were laid off, are classified as employed.

- (ii) Unemployed Persons: all those who, during the specified week, did no work at all, and
 - (a) did not have a job or business and were looking for work (including those who stated that they would have looked for work had they not been temporarily ill, and those who would have looked for work had they not already made definite arrangements to start work in a new job after the specified week), or
 - (b) were laid off from their jobs without pay for the whole week.

Persons who either lost their jobs or were laid off during the specified week, but did some work during that week, are classified as employed.

- (iv) Persons Not in the Work Force: those who, during the specified week, were not classified as employed or unemployed. This category therefore includes persons without a job, business or farm and not looking for work, who, during the specified week, were:

keeping house (unpaid)
 attending a school or university
 retired or voluntarily idle
 permanently unable to work
 inmates of institutions.

4. Nature of Estimates. - Since the survey estimates are based on a sample they are subject to sampling variability, that is, variations that might occur by chance because only a sample of the population is enumerated. Further information on variability of survey estimates is available on request.

In addition to the factors referred to above, the attention of users of the statistics in this section is directed to the fact that figures in Table 15 are rounded but not adjusted to add to totals because such adjustment would, in some cases, exceed the sampling variability of the estimate and tend to destroy its value as an indicator of movement.

NOTE. -

A brief summary of the results of work force surveys for the period August, 1962 to November, 1965 is given in Tables 13 and 14. More detailed figures were published in the November, 1965 issue of this bulletin.
